

Vending Solutions

Every Small Part Counts

We're here to manage them for you!SM

Applied Maintenance Supplies & SolutionsSM (Applied MSSSM) vending solutions bring control to your inventory so you know where your assets and consumables are at all times.

Managing inventory with Applied MSSSM equipment reduces MRO supply costs and time spent searching for supplies by securing distributed inventory and offering accountability for misplaced assets. Applied MSSSM delivers solutions to manage the most critical assets and commonly used MRO supplies.

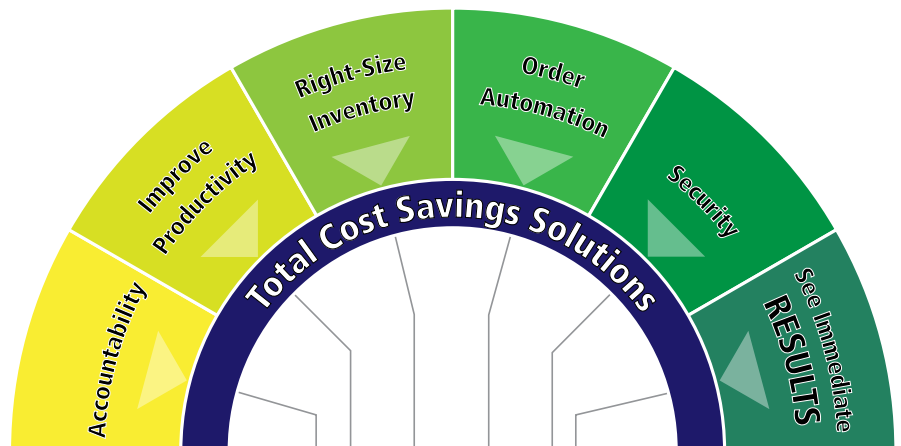

Features and Benefits

Applied MSS vending systems consistently deliver cost savings and results that include:

- 20-40% reductions in spend when adding control to distributed inventory
- Reduction in on-hand inventory levels by 20-30% increasing turns and effectiveness of working capital
- Elimination of unaccounted tool loss
- Reduction in procurement costs through automated ordering, interfacing into customer systems and inventory alerts to avoid stockouts and associated expedite charges
- Improved workforce productivity by eliminating time away from work area

POWERFUL SOLUTIONS. POWERFUL OUTCOMES.

Set controls so workers have required access to products and quantities necessary for the job. Track usage by individual, job, group, cost center – customize and configure reports to suit your needs.

Products are available 24/7 to the workers who need them.

Instead of overstocked boxes on your shelves, stock the right amount of inventory in the dispensing systems.

Orders are placed automatically; your local Applied MSSSM sales professional monitors usage online and makes sure the machine is properly replenished.

- Improved user accountability.
- Significantly cuts time spent by workforce traveling to the storeroom to acquire items.
- Eliminates stock outages on critical items.
- Save money by reducing on-hand inventory levels.
- Automated replenishment improves efficiency.
- Comprehensive web-based reporting and analysis tools.
- Supports weekend and 3rd shift production.

Control unauthorized usage and theft.

SupplyBay®

The Best Return on Investment in Helix Dispensing

SupplyBay® provides Absolute Control® for high volume dispensing in either a Lexan clear door or solid door device. Engineered for harsh, industrial environments to deliver reliable, high-volume dispenses year-after-year for a wide range of tools and supplies.

SupplyBay comes with various helix types and dispense aids to meet your custom dispensing needs, and can be combined with additional SupplyBays or other Applied MSS™ vending devices.

SupplyBay Features

- Wrap around LED lighting
- Large dispensing door
- Available with solid or Lexan clear door
- SupplyLink or key-pad controller
- Smart motor technology
- Easy to load and refill
- Easy to reconfigure – no tools required
- Large variety of risers and dispense aids
- Patented multiple motor rotation – a necessity for larger items using more than two positions
- Machine measures 72" H x 34-1/8" D x 41" W

FEATURE HIGHLIGHT

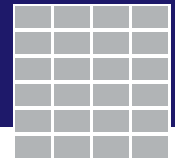

Swing-Arm Controller

The SupplyBay 3.0 features a unique swing-arm keypad controller for easy refilling and administration at point-of-use.

SupplyBay Comes with Various Helix Types and Dispense Aids to Meet Your Custom Dispensing Needs

The key to flawless dispensing is having the right dispense aids combined with industry knowledge and experience. Applied MSS sales professionals work with you to ensure that your facility's individual dispensing needs are met, accurately and efficiently.

Know Where Expensive, Mission Critical Tools Are At All Times

Tools used in the manufacturing process are ideal candidates for management within an Applied Maintenance Supplies & SolutionsSM (Applied MSSSM) vending device. Typically these items require greater control and different business rules to manage than traditional consumable applications (gloves, abrasives, batteries, inserts, etc.).

Specific reports designed to manage tool and asset applications include:

- **Check Out Report** – see who has all currently checked out products from any or all devices
- **Lockdown Report** – shows all tools currently in stock but locked down either due to an aging condition reached or user initiation
- **Serial Number History Report** – immediately retrieve a full history for auditing by user, stock location, job, etc.
- **Calibration Due Report** – identify items within certain days of reaching the defined aging rule
- And many more!

SupplyLocker[®]

Industrialized Locker Management of Consumable and Returnable Materials

SupplyLocker[®] is the industrial solution to manage consumable and returnable tools, supplies and other assets including hand and power tools, portable computers, handheld radios, and rechargeable items. Its flexible modular design lets you configure each system to meet your facility requirements. In addition to our patented take / return technology, advanced control capabilities include:

- Tool and gauge calibration
 - Certification standards
 - Lockdown requirements
 - Loan periods
 - Quantity limits
 - "One-for-One" exchanges
 - Machine measures
- 76" H x 22" D x 36" W

SmartDrawer[®]

Multiple Levels of Control in a Small, Simple to Use and Expandable Cabinet Solution

The versatile SmartDrawer[®] solution allows users to choose the best level of access control and accountability for each application. SmartDrawer lids can be set to provide Absolute Control[®] for single-item dispense and return, or part number level control for higher-density management. The choice is yours.

SmartDrawer is available for new shop floor cabinets or can be retrofitted to existing cabinets – drawer-by-drawer.

SmartDrawer Features

- **Easy User Interface** - Pick-to-light with simple searching and item selection
- **Quick Pick Transactions** - Lid level picking with tailored business rules such as take and return, check-in / check-out, take only, lockdown, etc.
- **Full Usage Audit Trails** – See the item, who used it, where it was used
- **Choose Access Control** – By individual item or part number level

Applied Maintenance Supplies & SolutionsSM has partnered with respected industry leader SupplyPro[®]. Our partner provides the highest level of support to ensure your satisfaction. Customer support includes two centralized service centers and a field-based customer engineering team. One service center is located in Cincinnati, OH and one is located in San Diego, CA. These centers provide both reactive support through incoming calls and proactive support in the form of ongoing remote system monitoring and analysis.

Reporting Capabilities and Service & Support

A sample listing of reports:

Consumption Reports

- Consumption by Product and User
- Consumption by User and Product
- Consumption Snapshot by Allocation
- Consumption Snapshot by Device
- Consumption Snapshot by Product
- Trend by Device
- Trend by Product
- Trend by User and Product
- Trend by Vendor
- Raw Transactions

User Reports

- Product Access by User Group
- User Listing Details
- User Login and Activity
- Users Per Product Access Groups

Inventory Reports

- Current Inventory
- Inventory Movement
- Inventory Turnover by Part and Device
- Lockdown
- Restock by Device
- Stock Out Analysis

Check Out Reports

- Check Out Summary by Product Or Serial Number
- Current Check Out and Overdue Status
- Overdue History and Summary

Calibration & Serialized Items

- Calibration Due
- Calibration History
- Serial Number History

And Many More!

Click on the arrows to expand and include the details on what products were consumed for the date range and filters chosen!

Click here to export to excel

After any report is generated, additional filters are available to further manipulate the results - for example to then only show items with a total consumption amount of "\$15 or greater"

Customer Service & Support

A highly trained field engineering staff is located throughout the country to provide on-site system support when required.

SupplyPro also provides a national network of over 400 service technicians located throughout North America to ensure timely on-site response to any service related issue at your location.

Standard Service Offering Includes:

- Software License-System, with no restrictions or seat-based licensing
- Inventory Management Software
- Automated Systems Polling
- Automated Ordering and/or Requisitions
- 24/7 Web-based System Administration
