

Don't Let the Ball Drop on these End-of-Year Specials!

2023 / 2024

Out with the old, in with the new.

 **20,000** work related eye injuries occur each year

<https://www.bls.gov/if/nonfatal-injuries-and-illnesses-tables.htm>

Safety vests reduce accidents and injury by:

1. increasing visibility to drivers and equipment operators
2. increasing visibility in low light conditions
3. allowing people to be seen over further distances
4. allowing visibility from different angles
5. increasing visibility when in a group

<https://jksafety.com/blogs/jksafety-blogs/how-safety-vests-improve-your-visibility-lets-find-out>

 **22** MILLION workers each year are exposed to hazardous noise levels while on the job

<https://www.safetyproresources.com/blog/importance-of-hearing-protection-in-the-workplace>

SOLD OUT

A fresh start with sharp tools.

Regularly cleaning hacksaw blades will keep blades in a good condition and longer tool life

<https://uk.rs-online.com/web/content/discovery/ideas-and-advice/hacksaws-guide>

Cutting tool lubricant isn't just for power tools! Applying lubricant to a hacksaw blade can prevent overheating and extend tool life

<https://uk.rs-online.com/web/content/discovery/ideas-and-advice/hacksaws-guide>

Anytime a hacksaw blade shows signs of warping or wear and tear, it's time to replace.

<https://uk.rs-online.com/web/content/discovery/ideas-and-advice/hacksaws-guide>

Restock for the new year with the things you use the most.

Any time a semi truck needs to pull over to the side of the road, whether it be exhaustion, mechanical issues, lack of parking, or the need to check cargo, it is an invitation to risk. That risk can be minimized by increasing visibility anytime a truck must pull over. The use of triangle warning kits and safety vests are a great way to reduce risk when it is necessary to pull over.

The average U.S. trucker drives between **605-650** MILES PER DAY

7

Keep your machines running even in the coldest conditions.

Hydraulic power systems have become one of the major energy-transmission technologies used by all phases of industrial, agricultural, and defense activity.

<https://www.britannica.com/science/hydraulics>

A hose's lifespan depends on the use, some last **2 years** and some can last up to **10**.

In hydraulic power systems there are

5 elements:

- ◆ the driver
- ◆ the pump
- ◆ the control valves
- ◆ the motor
- ◆ the load

WARNING: Some dust created by power sanding, sawing, grinding, drilling, and other construction activities contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. Some examples of these chemicals are: lead from lead-based paints, crystalline silica from bricks and cement and other masonry products, and arsenic and chromium from chemically-treated lumber. Your risk from these exposures varies, depending on how often you do this type of work. To reduce your exposure to these chemicals: work in a well ventilated area, and work with approved safety equipment, such as those dust masks that are specially designed to filter out microscopic particles.
