### TrueSight® II ADF Welding Helmet with Balder® Technology

One of the best ADF welding helmets with Balder Technology sensors that pick up as little as .5 amps, and an auto-darkening filter with the highest rating for optical clarity. Enhanced features include grinding and torch modes, as well as increased shade ranges.

- Our largest viewing area of 4.00" x 3.25"
- Variable shade from 5-8 and 9-13 to shield and protect eyes from radiant energy during weld
- Comes with patented Balder technology optics, the highest rated optical class 1/1/1/1
- Intuitive digital controls
- Weld/Torch/Grind mode compatible
- Uses two AAA batteries, replaceable
- Low battery indicator
- Built-in magnification lens holder
- Comes with patented 370 Speed Dial headgear
- Meets ANSI Z87.1, CSA Z94.3 compliant, DIN+ certified

## JACKSON<sup>®</sup>

### Insight<sup>®</sup> ADF Welding Helmet

Insight ADF Welding Helmets provide professional-grade quality in HLX (Halo X) helmet configurations with improved 1/1/1/1 optical rating and True Color technology for superior welding clarity and reduced eyestrain.

- Viewing area of 3.94" x 2.36" offers unobstructed vision during each stage of the welding process
- Variable shade 9-13 to shield and protect eyes from radiant energy during weld
- Digital controls
- Weld and grind modes
- Meets ANSI Z87.1, CSA Z94.3 compliant

### NexGen<sup>®</sup> ADF Welding Helmet

One of Balder's first creations, NexGen ADF is tried and true technology that welders have continued to demand. NexGen uses a "surface mode" technology that allows for only the surface molecules to rotate when switching from light to dark states resulting in a very smooth transition that is less noticeable and easy on a welder's eyes.

- Viewing area of 3.94" x 2.36" offers unobstructed vision during each stage of the welding process
- Variable shade 9-13 to shield and protect eyes from radiant energy during weld
- Digital controls
- Meets ANSI Z87.1, CSA Z94.3 compliant
