

Miracle LED® Rough Service LED Light Bulbs

How do I know the size of my light bulb?

The letters in a bulb code indicate its shape and special features such as reflector type. The numbers of the bulb indicate its base size, which is based on its diameter at its widest point, measured in eighths of an inch (1/8").

The most common light bulb shapes include:

- A for Standard Household/Arbitrary
- C for Candle
- R for Reflector
- MR for Multifaceted Reflector or Quartz Reflector Lamp
- PAR for Parabolic Aluminized Reflector
- G for Globe
- T for Tubular

Type A Light Bulbs: A15, A19

Bulbs within the A group are widely used when it comes to standard lighting. They work well in various household and office fixtures, hall lighting, ceiling fans, and more. They're typically compatible with medium screw bases (E26 and E27).

How Bright is that LED?

Use the number of lumens to find the right replacement for your incandescent bulbs.

	250 Lumens	450 Lumens	800 Lumens	1100 Lumens	1600 Lumens
Incandescent	25 Watts	40 Watts	60 Watts	75 Watts	100 Watts
Energy Star LED	2-3 Watts	4-6 Watts	8-10 Watts	10-13 Watts	13-16 Watts

Miracle LED® Rough Service LED Light Bulbs

- Huge energy saver and LED technology
- For indoor and outdoor covered use
- Instant on bulb stays bright and safe for years with LED
- Classic Edison style and E26 base fits in any standard fixture
- Shatter resistant, shock resistant and energy efficient

PART #	SIZE	LED WATT	LUMEN	QTY.
