

INTRODUCING KWIK CUT® DURABLUETM JOBBER DRILL

This isn't your average drill bit. It's built to last with a special duplex coating that makes it tougher and more resistant to high heat. That means you get a much longer lifespan out of each bit, even in demanding applications.

Here's why the Kwik Cut® Durablue™ stands out:

- **Long-lasting performance:** The duplex coating (zirconium nitriding and TiN PVD) enhances the drill's hardness and durability, so it keeps cutting long after other bits give up.
- **Stays cool under pressure:** Improved thermal stability means it can handle high-temperature jobs without losing its edge.
- **No walking or slipping:** The self-centering 135° split point gets you started accurately.
- **Grip with ease:** Flats on the shank provide effortless chuck grip on sizes 3/16" - 1/2"
- **Red, white, and Durablue:** This drill bit is proudly made right here in the USA 

The Durablue™ is a tool designed to save you headaches and keep your projects moving forward.
