CHALLENGES IN MANUFACTURING

VMI helps manufacturers face their greatest challenges. Here's how:

REDUCING LABOR SHORTAGE:

By automating inventory management, tasks like reordering, stock checks, and organization, VMI allows in-house personnel to focus on higher-value tasks like production and equipment maintenance.

NO SUPPLY CHAIN DISRUPTION:

VMI offers real-time inventory visibility, ensuring you have the necessary parts on hand to reduce stockouts and production downtime.

AVOIDING INFLATION:

VMI maintains optimal inventory levels, reducing the amount of product tied up in unnecessary inventory. By reducing stockouts, VMI also reduces emergency orders by avoiding the need for expensive rush orders and panic buying.

USING TECHNOLOGICAL ADVANCEMENTS:

Customized solutions from Applied MSSSM combine the most flexible inventory management systems available with robust intelligence software made to improve productivity, increase efficiency and reduce inventory costs.

ENCOURAGING SUSTAINABILITY:

With VMI, we minimize the risk of overstocking and obsolescence, making sure you have only what you need but always when you need it.

INVENTORY MANAGEMENT SOLUTIONS

Track and control the boring stuff that makes the cool stuff.

A well-organized parts area for consumable items can save a company thousands of dollars a year in the reduction of downtime and time spent chasing parts off-site while improving overall shop productivity. There can be many challenges in trying to accomplish this on your own. At Applied Maintenance Supplies & Solutions®, we understand and we're here to help. We specialize in organizing, replenishing, and supplying all your essential maintenance parts, eliminating wasted time searching and minimizing downtime. Imagine the boost to your shop floor – your team finds parts instantly, gets back to work faster, and overall productivity soars. We go beyond parts; Applied MSS is dedicated to providing quality products and exceptional service to empower your success.

CONTROL

Our MRO specialists are tech-equipped for your convenience. They use mobile technology to access your complete account history and real-time stock levels across our entire network. Plus, our barcode scanner order processing system guarantees error-free ordering and expedites the entire electronic fulfillment process, saving you valuable time and frustration.

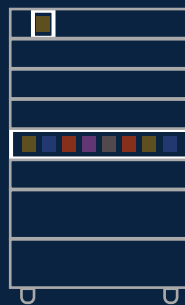

INDIVIDUAL CONTROL	COMPARTMENT LEVEL CONTROL	LID LEVEL CONTROL	CRIB MANAGEMENT CONTROL	VIRTUAL INVENTORY CONTROL
Enable single-item dispensing, for the ultimate in control	Allows multiple item/SKU dispensing and control per compartment.	Item/SKU dispensing per lid for single or multiple quantities per compartment. Compartments may be defined as consumable or take/return on a per lid basis.	Allows anyone with Android-based products to track transactions for items not within a SupplyPro device. Inventory is managed and tracked with full SupplySystem software reporting capabilities and business rules.	The SupplyPro Virtual Inventory Module tracks transactions for products not physically located within a device for inventory tracking, usage and reporting. It can incorporate customer's existing cabinets, shelving or storeroom facilities.
